PROFESSIONAL EXPERIENCE

Incif Technologies

DevOps Engineer

10/2020 - Present,

Roles and Responsibilities

- **AWS Infrastructure Management:** Designed and managed AWS infrastructure, leveraging services like EC2, S3, RDS, and VPC to support high-performance applications and services.
- **Infrastructure as Code (IaC) and Docker Expertise:** Implemented Terraform for IaC, reducing manual errors by 30%. Orchestrated Docker containers and containerized applications with Kubernetes, achieving seamless scalability and high availability. Maintained Docker images for consistent development, testing, and production environments.
- **Efficient CI/CD Pipelines:** Automated CI/CD pipelines using Jenkins, resulting in a 40% reduction in deployment time and faster time to market for applications.
- **Cost Optimization and Performance Monitoring:** Monitored infrastructure performance with AWS CloudWatch and implemented optimizations that reduced costs by 20% while enhancing scalability.
- **Security and Disaster Recovery:** Enhanced security posture through image scanning and access controls, complying with industry standards. Managed configuration with Ansible to maintain consistency and played a key role in disaster recovery planning, ensuring data integrity and system availability. Also, supported legacy application deployments, streamlining operations and improving system reliability

EDUCATION

Bachelor of Technology

Biju Patnaik University of Technology

Odisha

2017

SKILLS

AWS Cloud Services: S3, EC2, IAM, VPC, EBS, ELB.

DevOps Tools: Ansible, Docker, Terraform, GitHub CI/CD Pipeline, Jenkins.

Programming languages: Shell Scripting, Python.

Database Management: RDS.

Collaboration: Cross-functional Communication, Team Clb.

Methodology: Agile

PROJECTS

Bank of India (04/2021 - Present)

- Responsible for setup the CI-CD pipeline for which we
- are using Jenkins.
Writing declarative Jenkins pipeline script for
- continuous integration
- Highly Available Jenkins Installation and configuration of Master and slave nodes.
Managing configuration and provisioning infrastructure using Ansible.
- Developed and managed different GIT repositories
- including branching and merging.
Creating and Maintaining EC2 machines, creating AMI,
- EBS snapshots IAM.
Setting up SNS topics for Email and DNS for UAT Environments using Route 53
Collaborated with cross-functional teams to troubleshoot real-time issue

INTERESTS

Exploring the latest advancements in DevOps engineering technologies and methodologies.

Seeking opportunities for further professional development in the field of data engineering.
